

# PUBLIC NOTICE

## Fuel Management Work and Trail Closures

**Dates: January 20th, 2025 - February 7th, 2025**

**Where: Spirit Trail Loop, East Sector Lands**

**Fuel management work is set to commence on January 20th, 2025, along the Spirit Trail loop in the East Sector Lands, to implement the fuel management prescription created in 2024.**

Fuel management is the planned manipulation and (or) reduction of living or dead forest fuels for forest management and other land use objectives. The main objective of this fuel management prescription is to reduce the fire risk to the forest surrounding the popular Spirit Trail loop system and residential areas adjacent to the treatment unit by decreasing the likelihood of an accidental ignition. The prescription will take into consideration the area with 10-metres of the trail pathway.

There will be impacts to trail use during the Spirit Trail fuel management work to ensure safety. Please use caution in the area, and follow signage regarding any closures and detours that may be in effect.
